As requested. Eric pulled together today. I added Nature publication date in action timeline. I also put our estimated PRIA dates of June 2020 without SAP and January 2021 with SAP in this 1-pager per Alex's request.

Mike

Ed, helpful.

I got asked by EOP yesterday why we won't make PRIA deadline of 11/1 for this permit.

I think what is best is to add some dates to the paper you gave me – when did we get the “corrected” second application, why didn't we go to public comment til 9/11, what is the anticipated PRIA date, how many comments did we get so far? What are we hearing?

Information regarding OPP review of Oxitec EUP and relation to recently published article. Pretty straight forward information from the team. Drawing your attention to a couple of bullets in the document that we may want to discuss:

- Due to the critical nature of this issue and to ensure the safety of this novel technology, OPP would benefit from receiving additional scientific input from inside and/or outside the federal government.

This potentially raises the issue of whether an SAP process is warranted, which would effect timing.

Ex. 5 Deliberative Process (DP)
